Lancaster, Pa., Saturday, October 3, 1959

\$2 Per Year

New Holland Baby Beef Show Steers Sold

Brother-sister team from Bareville R1, walked off with both Grand and Reserve Championships in the beef show at New Holland Fair Tuesday.

A 1,010 pound hereford named Lucky captured the top prize for his youthful owner, Anna Pearl Lapp, daughter of Mr. and Mrs. John David Lapp, brother of Pearl, showed his Angus, the number two position and then went on to take away championship honors. His finished second in the contest.

According to the rules of the New Holland Baby Beef Show, all steers exhibited at the show are sold following the show. The 18 steers in the show weighed a total of 3,500 pounds and registered a price of \$5,131.48. The champion bought by the Holland Sales Stables at the sale was held, brought \$15 cents a pound for a total of \$515.10.

The price of the sale last week was the 60 cents a pound. Wesley Mast, Elverson, his Grand Champion yearling average of \$31.57 and a Redweight was slightly less than the \$32.22 last average.

Results of the judging, steers, and selling price

CHAMPIONSHIPS

Grand Champion - Anna Lapp, Bareville R1, Hereford

Reserve Champion - David Lapp, Bareville, R1, Angus.

ANGUS

David Lapp, 1,030 lbs., \$36.25; 2, Wesley Mast, Elverson R2, 1,020 lbs., \$36.25; 3, Mae Mast, Elverson 1,080 lbs., \$30.75; 4, Rho (Turn to page 14)

Members To NEPPCO

Lancaster County 4-H members will demonstrate poultry judging ability at the NEPPCO show in the Farm Show Building at Harrisburg.

Competition with other counties from 14 North Atlantic states, Kenneth and Glen Washington Boro R1. Present the poultry market demonstration with they won the state championship at 4-H club week in Penn State earlier in the year.

Kenneth will also help carry the banner of Pennsylvania 4-H poultry judging into the fray. Other members are Janice Miller, Reinholds; Paul Miller, Ephrata, and Mary Herr, Refton.

Prizes will be scored on ability to see six classes of poultry as the official judges select them. Selecting poultry in the laying house, identifying birds by breeds, production rate demonstration, selecting ready to lay birds in addition to a class of live market birds will be the areas which the team will have to overcome itself. Lancaster County club week this year.

THREE BREED CHAMPIONS at the Manheim beef show on Wednesday are posed with their owners. Left above Bruce Kulp, Manheim R4, shows the Hereford who went on to win the Grand Championship rosette. The Angus in the center gained Reserve Championship honors for his owner and exhibitor, Glenn Foreman, Manheim R3. Winner of the Shorthorn class was Terry Petticofer, Elizabethtown R3. L. F. PHOTO

Bruce Kulp Beef Champ At Manheim

Twelve year old Bruce Kulp, Manheim R4, showed his second steer, a sleek Hereford, to the Grand Championship at the Manheim Farm Show Wednesday, beating out a six year veteran, Glenn Foreman, of Manheim R3.

Kulp, an eighth grade student at Manheim central school is the son of Mr. and Mrs. Raymond Kulp. Last year in his first outing in 4-H competition, he showed his steer to third place in the class at Manheim.

Winner of Reserve honors was Glenn Foreman, son of Mr. and Mrs. Harrison Foreman. At the 1956 Manheim Farm Show, Foreman exhibited the Grand Champion, and then went on to capture the same prize at the State show in Harrisburg. His steer this year was bred by Mark Hosler, Manheim R3, and beat out a half brother, shown by Wilbur Hosler, on the way to the Reserve placing.

Champion for the Short-horn breed was shown by Terry Petticofer, son of Mr. and Mrs. Amon Petticofer, Elizabethtown R3.

Foreman came back in both the fitting and showmanship contests to place, but the best he could do was second. Top showman of the day was Kenneth Miller, of Manheim R2 who also showed the fattest steer. The fitting trophy went to Marlin Cassel, Manheim R1. Judge was Dauphin County Agent, Harold Stuart.

Complete results of the show follow.

County Youths To Show Cattle At Natl. Show

Two young dairymen from Lancaster County will be among the six from Pennsylvania selected to show Guernsey cattle at the 1959 National Junior Dairy Show at Waterloo, Iowa on October 7.

William F. Ferguson, Kirkwood and Karl Bender, Landisville will show the animals who won honors for them at the Pennsylvania Junior Dairy Show in the Farm Show Building on Sept. 19.

Har-Len K. Lola, a junior calf bred by Harry Mumma, Manheim R1, will be exhibited by Bender, while Ferguson will lead his Walnut Grove Levity Ann, a two year old cow bred by Hervy R. Ferguson, father of William.

The junior Pennsylvania showmen will compete with others from coast to coast for a share of some \$1500 offered in cash prizes and awards. In addition, each exhibitor is awarded a special show jacket by the American Guernsey Cattle Club.

Judge for this year's National Junior Guernsey Show will be C. R. Knight, Bakersfield, California.

Farm Calendar

Oct. 6-8—NEPPCO convention, Farm Show Building.

Oct. 9—7:00 p.m. County 4-H annual banquet and recognition night, Strasburg fire hall.

Oct. 10—S. E. District 4-H tractor driving contest, Schuylkill Co.

Nov. 24—Feeder pig sale, Farm Show Building, Harrisburg.

FIVE - DAY WEATHER FORECAST

Saturday - Wednesday
Temperatures will average 2-5 degrees above normal for the next five days. Normal temperature is 51 at night and 71 during the afternoon. Minor day to day temperature with mostly fair skies. Chance of occasional rain Sunday through Wednesday. Less than one third of an inch of rain fell on most of the county during the past week making the total for September less than half the normal amount. Some areas of the county have had above normal rainfall with heavy showers of the past week. September was the warmest in 28 years with temperatures averaging about 5 degrees above normal.

Joan Probst, Bob Kauffman Win In Dairy at Manheim

Joan Probst, Kirkwood R1 lead her champion Junior yearling Ayrshire to the Grand championship over the 2-year-old cow exhibited by Ned Paes, Strasburg, R1, at the Manheim Farm Show on Thursday.

In addition to the Reserve Championship, Paes collected the senior championship and was on hand to help his father, John Paes collect honors for the Junior Get of Sire and cow with best udder.

In the Holstein division of the show, Robert Kauffman, Manheim R1, took every championship trophy offered to adult dairymen. Carol Ann Hess, Strasburg R1, showed the champion 4-H animal to the win over Elvin Shelly of Manheim R1.

Following are the complete show results.

AYRSHIRE

Grand Champion - Joan Probst.

Reserve Champion - Ned Paes.

Junior Champion - Joan Probst.

Senior Champion - Ned Paes.

4-H Champion - Barbara Kulp.

Best Udder - John Paes.

Junior Get of Sire - John Paes.

Jr. Calf - 1. Ned Paes, Strasburg R1.

Sr. Calf - 1. Ned Paes; 2. Linda Eshleman, Elizabethtown R1; 3. John and Dorothy Paes, Strasburg R1.

Jr. yrld. - 1. John and Dorothy Paes.

Two to 3-year-old - 1. Ned Paes.

4-H AYRSHIRES

Jr. Calf - 1. Ned Paes.

Sr. Calf - 1. Ned Paes; 2. Linda Eshleman.

18 to 24 mo. - 1. Barbara Kulp.

Two to 3-yr.-old - 1. Ned Paes.

HOLSTEIN

Grand Champion Bull - Robert Kauffman.

Jr. Champion - Robert Kauffman.

Sr. Champion - Robert Kauffman.

Grand Champion - Robert Kauffman.

Jr. Get of Sire - Robert Kauffman Regal.

Best Udder - Robert Kauffman.

Brceaders Young Herd - Robert Kauffman.

Dairy Herd - 1. Robert Kauffman; 2. Donald Hershey.

4-H Grand Champion - Carol Ann Hess.

4-H Reserve Champion - Elvin Shelly.

Jr. Calf - 1. Donald Musser.

Mt. Joy R2; 2. Robert Kauffman, Manheim R1; 3. Richard Shelly, Manheim R1.

4. John Shelly, Manheim R1; 5. Glenn Myer, Manheim R3; 6. Larry Derr, Mt. Joy.

Sr. Calf - 1. Robt. Kauffman; 2. Carol Ann Hess, Strasburg, R1; 3. Miriam Kauffman, Manheim R1; 4. Elvin Shelly, Manheim R1; 5. Donald Hershey, Manheim R1; 6. (Turn to page 12)

Co. Beef Tour Is Scheduled

October 15 is the date of the fourth annual Lancaster County Livestock tour for beef feeders and hog producers, County Agent Max Smith announced this week.

Included in the tour, scheduled to leave the CTC bus barns on East Chestnut St., at 7:30 a.m., is a visit to the Consolidated Dressed Beef Company to see slaughter and processing of beef. Hog slaughter and processing of pork will be viewed at the Morrell Phoeelin plant, both the above slaughter houses are in Philadelphia.

Afternoon activities will include a trip to the farm of Vincent Neamond, Doylestown, Bucks County to observe a cattle and hog feeding operation. Mr. Neamond each year feeds out 450 steers and 100 hogs on a ration of bread and cracker crumbs supplemented with Urea.

On the return trip, a typical Lancaster County steer feeding operation featuring labor saving devices on the farm of Edward Nolt, New Holland R1, will be visited.

Interested livestock men in the county should make bus reservations with the County Agents office by October 12.

At Lancaster Yards Supply Light; Trading Slow

James E. O'Hara,
In Charge, Market News Branch

The receipts this wk will total about 1100 head less than last wk's 8044 head count. The supply consisted of 20 per cent slaughter steers and 70 per cent stockers and feeders.

The largest supply of the year of stockers and feeders were on hand this past wk. Trading was rather slow throughout the week. Compared with last wk's, close slaughter steers were 50 - 1 lower. Cows in daily decline close out the week 125-150 lower. Bulls sold about steady. Stockers and feeders were 50-1 lower with wgt. over 800 lb in fleshy condition off the most.

Load high choice and prime slaughter steers weighing 1235 lb sold for 30.15, few lots and loads high choice 950-1200 lb made 29.50-29.75. Bulk of the choice slaughter steers made 28-29.25. Good and low choice steers brought 25.75-28.25. Lot choice 840 lb heifers made 26. Cutter and utility cows made 15.50-18.25, Coml. cows up to 19.25, canners and low cutters 13.50-15.50.

Util and coml bulls sold at 22.50-26, and good grade fed bulls brought 26-27. Good and choice 800-1050 lb feeder steers sold for 25.75-28, few lots early in wk. up to 28.35, med. and good made 23.50-26. Good and choice 550-800 lb stocker steers at 26.75-31, and med and good at 25.25-27.25. Good grade stock calves made 29-33, and med and good brought 26-30.

The receipts of calves this week will total about the same as last wk's 681 head count. Trading was active and vealers held steady. Good and choice vealers 27-34. Choice and prime 34-39, and a few prime sold up to 40, stand. and low good kinds made 21-27, and util sold down to 18.

The receipts will total about 1400 head or 125 head less than last wk. Trading was moderately active. Bar-

rows and gilts were steady to 25 lower and sows held steady. U.S. 1-3 grade 190-230 lb barrows and gilts made 15-15.50, hogs more uniform for wgt and grade made 15.75-16.50, 300-600 lb. sows went to the scales at 8-12.

Trading was slow this wk. in the sheep division as spring slaughter lambs were 1-2 lower on about 700 head or 400 head less than last wk. Good and choice 65-95 lb. spring lambs 19.50-21.50, a few to 22, util and low good made 16-20. Cull to good shorn slaughter ewes made 44-8.

Tough Competition

(From page 11)

the trip came up with the following conclusions.

The U. S. will have to work hard to maintain exports to western European countries, let alone increase them. Higher prices and inflationary trends in the U. S. may make the job more difficult.

U. S. producers will need to produce specifically for the export market in these countries. They cannot be used as a dumping ground for surpluses.

Perhaps the greatest opportunity for increased U. S. agricultural exports lies in undeveloped countries of the world. If these areas can get their per capita incomes up, they can become large markets for the U. S. food and fibers.

Chicago Cattle Supply Off Price Steady

Marketings sharply curtailed after Monday, four day receipts 20 per cent smaller than last wk. when supplies were largest of the year to date. 70-75 per cent of receipts slaughter steers, 15-20 per cent heifers, and around 5 per cent cows and fully 5 per cent stockers and feeders.

Average wgt. of slaughter steers promising to be considerably lighter than last wk average of 1166 lbs; prices for slaughter steers and heifers trended lower early in the week but substantial gains were scored Wed when receipts were smallest for the day since July, as a result closing prices on slaughter steers around steady with late last week although some big weights over 1400 lbs still around 50 lower.

Heifers closed steady to 25 lower than late last wk; cows weak to 75 lower, mostly 50 lower despite late strength. Bulls mostly 1 lower. Vealers weak to 1 lower; stockers and feeders steady to 50 lower. Good clearance this wk. as opposed to late last wk.

Early bulk choice and mixed choice and prime steers 26-28.50; late bulk 26.75-29 week's early top on prime steers of 29 lowest of the yr to date, Wed load mostly prime 1212 lb steers 29.65, load 1080 lb wgt. 29.35 and around 6 loads high choice to mostly prime 1175-1325 lb. steers 29.25, few loads mixed choice and prime 1450-15-

New Holland Steer Market Is Steady

The outstanding feature of the New Holland steer sale on Thursday was the sale of the New Holland Baby Beef Club which averaged 31.57 in price and 1,016 in weight.

All steers grading choice and weighing under 1,100 active and 50 higher. Heavy weight short feds again 50 to 75 lower.

Stockers and feeders in a heavy run were 50 to \$1.00 lower.

Cow market was steady with last week, bulls 50 to 75 lower, choice to prime calves \$1 higher. All other kinds steady. Receipts for the sale were 850 cattle and 404 calves.

Prime Butcher Steers — \$29-31; choice—28-29; good —26-28; plain to medium—23-26.

Choice Butcher Heifers — \$25-26.85; good—22-23; plain to medium—19-22; common yellow heifers —15-19.

Good Bulls — \$24.50 plain to medium—21-24 bologna bulls—20.50-24.

Good Butcher Cows — 18.50; med —15-17, can and cutters—13-15.

Stockers and Feeder S — \$23-27.60.

Stock Steer Calves — 31; choice to prime—30-40.50; good—32-36, med —26-32; thin—21-26, heavy calves—23.50-26.

The September 30 sale had 130 cows and 1 ock bulls on a steady market. Fresh Holstein cows \$350-470, guernseys—25-300; others 250-300.

Stock bulls—\$82-165.

The September 28 sale had receipts of 187 ses. All mules went for ers. Market was mostly dy to weaker.

Mules—\$125-152.50, ies—70-140, Riding Hots—125-250; Driving Horses—110-175, Killers—7-12.

READ HONEY LABEL

Read labels when buying honey, advises Miss Elaine B. Love, Penn State extension consumer education specialist. Color, flavor and aroma of honey with the flowers from which bees gather nectar. Honey with a distinctive flavor generally label with source of the nectar. A label doesn't indicate nectar source, the honey usually is a blend of different neclars. As a rule the color of honey, milder the flavor.

00 lb steers 25.50—27.25 and two loads comparable grade 1770-lb beeves 25.75 while high choice under 1200 lb. steers sold as high as 28.25.

Standard and good vealers 25-32, few good and choice 33, cull and utility vealers 15-24. Loadlots good and mixed good and choice 535-765 lb. stock steers 26.50-29, few loads good and choice 850-1025 lb feeding steers 25.25-16.35, load medium 945 lb wgt. 24.60, load good and choice mostly good grade, 500 lb. stock heifers 28.

Special Feeding Program for High Producers

BEACON HI-SPEED DAIRY PROGRAM

Beacon has developed a feeding program to meet special nutritional requirements of high producing cows. It's designed to help each cow express her full milk potential, get greater returns over feed cost. In actual performance at the Beacon Dairy Research Farm it has just that.

● HIGHER MILK PRODUCTION

Records on 11 cows 2X, 305d., M.E.

New Program (average age 6-4) 18,347 lbs. avg.

Old Program (average age 5-3) 16,885 lbs. avg.

Average increase on new program 1,462 lbs.

● GREATER RETURN OVER FEED COST

On the average, each cow received 360 lbs. more milk on the new Hi-Speed program. With grain at \$4.20, cows on the new program averaged \$49.20 more above feed cost than on the old program.

We'd like to tell you more about
the Beacon Hi-Speed Dairy Program
Just phone us today and we'll gladly supply details.

Farm Safety Rule Machines Can Not Think

The engineers who design modern farm equipment put safety high up on the "must" list. Every feasible safety feature is incorporated. Elaborate instructions for safe operation are made available to the user.

But the equipment makers have no control over what happens once the machines reach those users. They can't prevent tragically idiotic practices which lead to death and injury.

The Metropolitan Milk Producers' News tells of some totally needless accidents that occurred lately in the East. In one, for example a 12-year-old boy drove a tractor over a steep incline, and lost both legs. In another, a 59-year-old farmer lost his right arm while attempting to fasten the shield on his tractor's power take-off without bothering to stop the engine.

It's obvious to anyone that

these dreadful accidents should never have happened. In no case should children be allowed to operate equipment. And the farmer who is too lazy or too thoughtless to stop the engine before making repairs or adjustments is simply asking for disaster. And the same thing is true of virtually all other types of equipment accidents especially those that result when farmers make design changes and mechanical improvements of their own devising.

The machines are safe—if the operators will think of safety and follow the simple common-sense rules involved.

Soil Conservation District Schedules Forestry Meeting

Trees, and the conservation of soil and water will be the topic for discussion at the meeting planned by the Lancaster County Soil Conservation District on October 7 in Solanco High School, Quarryville. The program, scheduled to begin at 7:30 p.m. will feature a talk by Dr. Thomas DeLong, Supervisor of the Pennsylvania State Tree Nursery, titled, "What the Pennsylvania Department of Forests and Waters Offers You."

John Eicholtz, District Game Protector will speak on the subject, "Trees and Game." The role of trees in the conservation program will be discussed by W. Martin Muth, Work Unit Conservationist with the Soil Conservation Service.

A panel of local farmers, moderated by John Kitch, Service Forester of the Pennsylvania Department of Forests and Waters, will discuss some of the things they have learned about tree planting. Taking part in the panel discussion will be Joseph Lesley, Oxford R2; Lloyd Brabson, Peach Bottom; Forest Preston, Nottingham R2; Jesse Cutler, Drumore, and Walter K. Smith, Borough Manager of New Holland.

"Trees, Conservation, and You" will be the title of an illustrated talk by Howard Bush, Area Conservationist from West Chester. Miss Dorothy Y. Neel will explain how Agricultural Stabilization and Conservation pay-

ments are made to land owners for planting trees.

Amos Funk, Millersville, Director of the Soil Conservation District will be in charge of the meeting. All interested farmers in the county are invited to attend.

Hybrid Corn Plots To Be Husked Out

James Eakin, Agronomist from the Pennsylvania State University will discuss the merits and faults of several commercial hybrid seed corn varieties when two demonstration plots are husked on county farms next week, according to Harry Sloot, Associate County Agent.

"Farmers from all parts of the county are invited to attend the demonstrations and help in husking," Sloot says. Characteristics and performance of 30 of the better adapted varieties can be seen and compared.

The first of the demonstrations is scheduled to begin at 8:30 a.m. on October 7, at the farm of Willis Hackman, one mile southeast of Elizabethtown. On the following day the action will move to the farm of Christian L. Landis, Ronks R1. The Landis farm is located 1½ miles southeast of Strasburg, south of the Strasburg-Gap pike on the Rohrer's Mill Road.

In the event that weather conditions would prevent husking on Wednesday, October 7, Hackman's corn will be husked on Thursday, and Landis' on Friday.

Government Agencies

Decisions made by commissioners and board members of government agencies in Washington have a tremendous influence on thousands which serve you every day.

These are boards and commissions which Congress created and to which it granted broad powers over practically every form of business, including telephones, radio and TV stations, airlines, transportation companies, etc.

The commissioners and board members have the authority to hold hearings and make decisions that have a life or death effect on businesses which they are charged with regulating in the public interest.

For example, a decision by the Federal Communications Commission can result in the loss or profit, of millions of dollars to a company engaged in broadcasting. Likewise, a decision by the Civil Aeronautics Board may have the same effect on an airline.

Question of Legality

While Congress delegated authority to the board members and commissioners to make quasi-judicial decisions the Supreme Court has said that before doing so they must hear or read all of the evidence in each case.

Mr. Robert Lishman, chief counsel of the watchdog committee created by Congress to oversee operation of the agencies and boards, pointed out to us in an interview, that this often results in a "legal dilemma."

"It is well known," he said, "that the commissioners and board members of government agencies do not read all of the evidence submitted to them in many cases which they decide."

"It is not possible to do so because in many cases the volume of evidence is measured not in pounds but in tons," he said. Probably a very large percentage of the formal decisions by the commissioners and board members are illegal.

Experience Needed

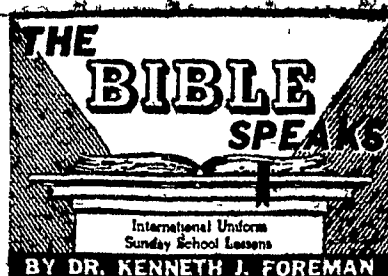

Being forced to abide by illegal decisions is bad enough, but a further burden is being passed on to business in many cases because the commissioners and board members have had no previous experience in the type of business over which they preside. In such cases they are forced to rely on their staff for the decision which they themselves are supposed to make.

A notable exception is the Securities and Exchange Commission, which supervises stock exchanges, security dealers, investment companies and public utility holding companies.

All five of the members have had experience in those fields. The Chairman, Mr. Edward N. Gadsby, was a commissioner and General Counsel of the Massachusetts Dept. of Public Utilities for nine years.

Mr. James Sargent served as the Administrator of the New York Regional Office of the SEC prior to becoming a Commissioner. Another Commissioner, Mr. Andrew Downey O'rick, formerly acting chairman of the Commission was the Regional Administrator in San Francisco. Mr. Harold C. Patterson served as Director of the SEC's Division of Trading and Exchanges before becoming a Commissioner, and Mr. Earle F. Hastings served as Director of Securities, Arizona Corporation Commission, before becoming a Commissioner.

Give Lancaster Farming a chance to work for you.

Bible Material: Acts 1.
Devotional Reading: John 14:12-21.

Testimony

Lesson for October 4, 1953

FOR SIX MONTHS now the Bible study shared by the more than 80 Christian Churches that use the "Uniform Bible Lessons" is going to be the book of Acts, in the New Testament. It is one of the easiest books in entire Bible to read; it is interesting enough to read clear through in one evening; important enough to re-read many times. It is the story—the only connected story—of how the Christian Church got started and how it spread. The readers should see the book of Acts in a modern English translation, in order to understand more quickly. All that can be done in this column week by week will be to point up some particular truth or truths of practical importance for life today.

Dr. Foreman

The story of the Christian Church begins with Jesus. He gave the marching orders. The church is a true church when it carries out his directives, it fades away into a no-church when it forgets the Master. Now the question Americans always ask about anything—a club, a gadget, a machine, even a hole in the ground—is: What is it for? What's it supposed to do, and will it work?

"My Witnesses"

What is the Church supposed to do? What is it for? That is a fair question. The New Testament presents the Church under various names, and gives various (though not contradictory) answers to that first question. One of the plainest of these answers is in the words of Jesus which shine like a beacon-light in the very first lines of this book of Acts—a light which gives direction and meaning to the whole story, and indeed gives direction and meaning for the Church of today.

YOU SHALL BE MY WIT-

Now Is The Time . . .

BY MAX SMITH

MAX SMITH

TO ADD WATER TO CORN SILAGE
Corn has matured rapidly in recent years and many crops are beyond the best stage for top quality silage; the fodder is too dry and it is difficult to get it packed sufficiently to press out all of the air pockets. This means that water should be added to the silage or frequently flood the silo during the filling operation.

TO ESTABLISH CONTOUR STRIPS
Many conservation-minded farmers are establishing their contour strips in the fall by seeding every other strip to either winter barley or wheat, spring the strips in between the small grain strips are planted to corn or some row crop. On sloping or hilly strip-farming is worthy of serious consideration.

TO BE CAREFUL WITH PURCHASED CATTLE
Buying time is at hand for many feeders; the practice of allowing recently shipped cattle to come into contact with cattle already on feed or with any dairy animals on farm is dangerous. Newly purchased animals should be segregated from the rest of the herd for at least two to three weeks. Shipping fever losses take too high a toll each year.

TO PREVENT WINTER GRAIN LODGING
On farms the problems of lodging is increased by too much nitrogen in the fall and by the use of too much nitrogen fertilizer. On fields of average fertility where the grain follow heavily fertilized crops such as tobacco, corn, or potatoes, only a phosphorus-potash fertilizer as 0-20-20 or 0-15-30 should be used this fall; these fertilizers will aid both root and seed development and strengthen the straw. Nitrogen will result in more rank growth and more severe lodging.

New Vet For Oxford Area

Dr H Lincoln Esterbrooks of Mendenhall, Pa., a 33-year old veterinarian, presently serving a tenure as Associate Professor of Veterinary Medicine on the faculty

DR. ESTERBROOKS

of Veterinary Medicine, University of Pennsylvania, plans to start work as a general veterinary practitioner in the Oxford area on October 5th.

Dr Esterbrooks and his family will move from Mendenhall to Oxford as soon as the real estate agent has made some conversions to the basement of the property which will permit it to be used as a Small Animal Hospital.

Dr Esterbrooks, a native of Dudley, Mass., where his father and brother still operate a dairy farm, was graduated D.V.M. from the Ohio State University in 1948.

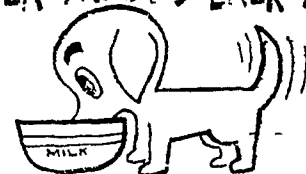

After a year of general practice in Concord, N. H., he became Assistant Professor of Animal Diseases and Extension Veterinarian at the University of Connecticut where he was granted the M.S. Degree in 1951.

Dr Esterbrooks is a member of the American Veterinary Medical Association, Phi Zeta, an honorary veterinary fraternity, and Sigma Xi, an honorary scientific fraternity. He is a member of Webster, Mass. Lodge A.F. and A.M. and Harverstraw, N.Y. Lodge B.P.O.E.

Dr Esterbrooks, a member of the Kennett Square Junior Chamber of Commerce, served as its secretary last year and is presently serving as its President.

He and his wife, the former Miss Norina Plimpton of Sturbridge, Massachusetts, have three children, all girls: Cheryl Faye, 11; Susan Raye, 9½, and Sandra Kaye, 4. The two older girls are presently enrolled at Kennett Consolidated School but are looking forward to their new home and friends in Oxford soon.

MILK MAKES ENERGY

Robert Armstrong Named Master Of Fulton Grange

Robert Armstrong, Drumore R1, son of Mr. and Mrs. Ralph Armstrong was elected Master of Fulton Grange 66 at the last regular meeting. Armstrong moves into the top spot from the office of Overseer which he held for the past year. In moving through the chairs he was Gatekeeper for two years and Steward for two years. Retiring Master is C. Edward James, Drumore.

Armstrong began his work at the age of six when he became a charter member of the Fulton Juvenile grange. After joining the adult grange when he was 14, Armstrong worked his way to the office of Assistant Steward in the Lancaster County Pomona Grange.

A graduate of Solanco High School, Armstrong has been active in 4-H work, and is at present an active member of the Solanco FFA and Young Farmers Association.

Scheduled to take office on October 12, Armstrong says he hopes to see more growth and development of the Grange and will start meetings at the appointed time in an effort to encourage interest.

Other officers elected at the meeting were David Wis-

ROBERT ARMSTRONG

slar, overseer; Jeannette McCummings, lecturer; Ambrose Giffing, steward; Clair Murphy, assistant steward; Robert Reed, chaplain; Laura B. McSparran, secretary; Walter Wood, treasurer; Earle Gilbert, Jr., gatekeeper; Dotty Black, Ceres; Ann Giffing, Pomona; Joanne Beck, Flora; Marie Murphy, lady assistant steward; Beverly Styer, juvenile matron; Mrs. Suzan Fite, librarian; Charles McSparran, purchasing agent; Gyles Brown, executive committee chairman; Theodore Beck, finance chairman; Robert Reed and Walter Wood, trustees.

In other business the grange passed a resolution commending assemblymen Wood and Eshleman for

their stand on Bible reading in the public schools.

A folk and square dance team from Fulton Grange will compete in the sectional elimination contests this evening at the Owen J. Roberts School, Pottstown.

Other entrants in the eliminations will be Clair Murphy, vocal soloist; and in a vocal quartette Mrs. Theodore Beck, Mrs. Charles McSparran, Clair Murphy, and Robert Reed.

Farmers Assn. To Hear Dague

The Honorable Paul B. Dague, congressman from the 9th Pennsylvania district will be the main speaker at the annual meeting of the Lancaster County Farmers Association on October 8.

All members are urged to attend the program scheduled to begin at 7:00 p.m. at

Hostettlers banquet Mt. Joy.

The Lancaster County Farmers Association is with the American Bureau, according to Greider, Mt. Joy R1, president of the assn.

In addition to the of Representative Dague program includes a discussion on resolution be presented to Lancaster County representatives.

Merryknoll Sexlink (Rock x Red)—Bred by electronic "brain" methods.

Golden Sexlinks — Harco male x Andrews White Rock female. They're tough, and great layers.

Cobb's White Rocks — Broiler Test winners and good layers too.

Vantress x Cobb White Rocks — Popular for meat.

Garrison Cornish Male x Cobb White Rock female. Super meat quality.

Gove's Barred Rocks.. Still a favorite of many farmers.

Burling's New Hampshires. Carefully selected stock.

When you're ready to order, pick up the phone and call Oxford 286 collect.

Household Hints

When you are asked to make sandwiches for a large group, spread a thin layer of soft butter or mayonnaise to cover crusts, edges, and corners of the bread. This prevents soaking the bread.

Waxy rice used to thicken sauces and gravies for freezing will not "curdle" after thawing as do some of the usual thickeners.

Protect your shrubbery when painting the exterior of your house. Cover shrubbery with an old sheet, plastic or paper dropcloth.

Turkey is highest in protein of all meats, and, along with roast chicken, lowest in fat.

As you remove garments from moth-ball storage, tumble them in the dryer with no heat for a few minutes to help get rid of the odor.

If a blouse doesn't fit well or requires much altering or conditioning it is a poor buy at any price.

Cover a dark or shiny study top with a light colored blotter to reduce glare and lessen contrast.

On half-cup of diced fresh pineapple will supply about one-fifth of the daily recommended allowance of Vitamin C for an average man—and only 34 calories.

When sewing wash-and-wear fabrics, press seams and folds only when you are sure of the seamlines, as pressed creases will leave marks on this material.

Remove the cellophane wrapping from a lampshade before you use it. These wrappings create glare and may cause the frame of the lampshade to warp.

Place all roasts, except rib roasts, on a rack before you put them in the oven. A rack allows heat to circulate more freely and keeps the roast out of its drippings. With a rib roast, a rack is unnecessary because the bones form a natural rack.

Spots can easily be removed from sofas and chairs that have cotton-cushioned inner-spring construction. Cleaning fluids, which would damage foam rubber, are not harmful to cotton cushioning.

Local Company Announces New Hatchery Site

Announcement was made this week by Mr. Leslie S. Hubbard, Hubbard Farms Hatcheries, of the opening of a new branch hatchery at Grove City, Penna. This new location will serve poultrymen in western Pennsylvania and eastern Ohio.

Located in Mercer county at the site of the former Richey Hatchery, the new facility will be managed by Thomas F. Richey, Jr. A graduate of the Pennsylvania State University, Richey has been operating the hatchery at its present location for the past 30 years. He was one of the first individuals in Pennsylvania to operate an accredited hatchery.

Both meat and egg strains of chicks will be produced at the hatchery. In addition the Grove City plant, Hubbard has hatcheries at Walpole, N. H.; Statesville, N.C.; and Lancaster.

Lancaster Farming advertising brings results

4-H Baby Beef Deadline Date Is October 15

Farm boys and girls in Lancaster County 10 to 20 years old are reminded that time is here to enroll for Baby Beef Club.

Members are required to feed a steer of one of the three established beef breeds until finished next fall. Young farm people in the club will receive instruction in feeding, fitting, preparing and showing steers, and keeping records on the enterprise.

Two beef clubs are active in the county. The county wide Red Rose Club shows calves at the Southeastern district show, the Pennsylvania Livestock Exposition, Eastern National Exposition, and the Penna. Farm Show. The New Holland club has membership restricted to the northern section of the county, and all steers in the club are shown and sold at the New Holland Fair.

Boys or girls interested in joining either club should contact the county Extension Office, 202 Post Office Building, Lancaster, or one of the local leaders by October 15.

Club leaders for the Red Rose Club are Mylin Good, Manheim R1; Fred Linton, Quarryville R2; Victor Longenecker, Elizabethtown R3; Jay R. Nissley, Manheim R4; Ira L. Rutt, Peach Bottom; and Harry S. Showalter, Reinholds R1.

In the New Holland area the leaders are Lester Good, East Earl R1; John B. Lapp, Bareville R1; and Jacob K. Mast, Elverson R2; and Lester M. Weaver, New Holland R1.

For the Farm Wife and Family

A Good Breakfast

by Mrs. Richard C. Spence

Breakfast is the most important meal of the day. Between the evening meal and breakfast, there is a 10 to 12 hour fast and every person needs a good breakfast to re-fuel his body. Without breakfast he may feel tired, be irritable, or have a headache during the morning.

Studies show that persons are more alert and can do their work better when they eat a good breakfast. This is true of adults and children alike. A child who eats a good breakfast has a better chance to do well in his studies than if he went without breakfast or ate only a skimpy one.

Breakfast should supply one-fourth to one-third of the daily food requirements. This first meal should contain these foods: fruit or juice; a protein-rich food, such as cereal and milk, eggs, meat, or cheese; bread or other cereal products; and milk. Eating snacks and larger lunches does not make up for the lack of breakfast.

Breakfasts can be made so appealing and appetizing that the family won't want to miss them. It's easy to vary

hot cereals by cooking frozen canned, or dried fruits with them. Adding dried beef, grated cheese, or a pinch of an herb gives a new different flavor to scrambled eggs. A sprinkle of shredded cheese over fried eggs just before they are done adds interest and food value.

Let's see what a good breakfast does for you:

1. Fruit — gives zest to meals, helps prevent constipation, and supplies a goodly amount of vitamin C.
2. Cereals, bread — give protein, iron and other minerals, vitamins, and food energy.
3. Milk — a good source of calcium, the B-vitamin riboflavin and top-grade protein.
4. Eggs, meat, fish — provide high grade proteins for body building and repair, and they have mineral and

other values besides.

5. Something hot — is cheering and gives you a sense of well-being.

SOMETHING DIFFERENT FOR BREAKFAST — Most folks like a change now and again. Here are a few ways to get variety — and maybe surprises into breakfast.

Mix fruits — berries with sliced peaches, for instance, or sliced bananas with oranges — for change of flavor, and when you haven't enough of one kind to go around.

To add interest to cereals, top with favorite fruits — fresh in season, or frozen, canned, or dried. Fruits go well with both hot and ready-to-eat cereals.

Sprinkle grated cheese over eggs to be baked, or combine with scrambled eggs for a different flavor treat.

Scramble eggs with tomatoes. To serve 6: Beat together 6 eggs and a cupful of of cooked or canned tomatoes. Season, and cook in a little fat over low heat, stirring constantly, until as firm

as you like it.

Broil or fry tomatoes — red or green — and serve with bacon.

Take a tip from New England and have Saturday night's baked beans for Sunday morning — perhaps with codfish cakes and brown bread.

Chop cold potatoes, heat in a little fat, then scramble them with eggs.

Brown slices of leftover oatmeal, cornmeal mush, or other cooked cereal in a little fat. To slice and brown well, the cereal must be cold and thick.

Split leftover rolls, biscuits, muffins, or cornbread and toast in the oven. Or put crisp brown bacon between halves of toasted rolls.

Use stale bread to make an old favorite — french toast. Dip bread in a mixture of egg and milk or egg and tomato juice. Brown care-

fully in a little fat.

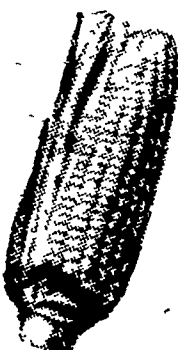

Saute chicken livers — serve on toast. Crisp can be used as a garnish.

A favorite breakfast especially with the men — good old-fashioned pancakes. A pancake is no longer a pancake — fruits, cheese and the like can be added to the batter — very palatable flavor — make your own batter is a basic recipe.

Griddlecakes

- 1½ cups sifted enriched flour
- 1 tablespoon baking powder
- 2 tablespoons sugar
- ½ teaspoon salt
- 1 egg, beaten
- 1½ cups milk
- 3 tablespoons melted shortening
- Sift together flour, baking powder, sugar and salt
- Combine egg and milk

For the Farm Wife and Family

1. Peach Pancakes — Add 1 cup drained, chopped, canned peaches to above batter. Bake; serve hot with syrup.

2. Jelly-Filled Pancakes: Butter hot pancakes; spread with a tart jelly or jam and roll up. Sprinkle with confectioners' sugar.

3. Blueberry Pancakes — Add 1 cup fresh or drained frozen or canned blueberries to batter. Bake; serve with butter and brown sugar.

4. Ham and Cheese Pancakes—Add 1 cup coarsely chopped cooked ham and ½ cup grated cheese to batter. Bake; serve with raisin sauce.

5. Pimento Pancakes—Add 2 tablespoons finely chopped pimiento and 2 tablespoons chopped green pepper to batter. Bake; serve with cheese sauce.

6. Pancake Meat Rolls — Add 1 small onion (minced), 1 cup finely chopped cooked beef or chicken to batter. Bake. Sprinkle cakes with 2

tablespoons chopped parsley; jar. (If melted shortening is used, add after pancake baking dish. Sprinkle with ½ cup grated cheese. Bake in moderate oven (275 degrees) about 10 minutes.

7. Apricot Treats — Bake pancakes. Serve with apricot-maple sauce (made by simmering 1½ cups maple syrup for a few minutes, then adding 2 tablespoons butter and ½ cup apricot nectar).

Banana Pancakes
1 cup milk
1 egg
1 tablespoon liquid or melted shortening
1 cup pancake mix
2 bananas.
Place milk, egg and shortening in a shaker or glass jar. (If melted shortening is used, add after pancake baking dish. Sprinkle with ½ cup grated cheese. Bake in moderate oven (275 degrees) about 10 minutes. Cut bananas in half crosswise. Then cut each half into 4 spears. For each pancake, place two banana spears on a hot lightly greased griddle. Pour about ¼ cup batter over bananas. Bake to a golden brown, turning only once. Serve with butter and syrup. Makes 7 to 8 pancakes.

CONTROL POND WEEDS

Owners of farm ponds having a weed problem can get instructions on control from their county agricultural agent, says Robert Wingard, Penn. State extension wildlife management specialist. A permit obtained from the local fish warden is required to use chemicals for weed control in the pond.

Here are some suggestions for some easy "deluxe" pancakes:

1. Peach Pancakes — Add 1 cup drained, chopped, canned peaches to above batter. Bake; serve hot with syrup.
2. Jelly-Filled Pancakes: Butter hot pancakes; spread with a tart jelly or jam and roll up. Sprinkle with confectioners' sugar.
3. Blueberry Pancakes — Add 1 cup fresh or drained frozen or canned blueberries to batter. Bake; serve with butter and brown sugar.
4. Ham and Cheese Pancakes—Add 1 cup coarsely chopped cooked ham and ½ cup grated cheese to batter. Bake; serve with raisin sauce.
5. Pimento Pancakes—Add 2 tablespoons finely chopped pimiento and 2 tablespoons chopped green pepper to batter. Bake; serve with cheese sauce.
6. Pancake Meat Rolls — Add 1 small onion (minced), 1 cup finely chopped cooked beef or chicken to batter. Bake. Sprinkle cakes with 2

VanDale AUTOMATIC FEEDING

Finger tip silage feeding, from silo to feedlot, without ladder, bent back or pitchfork

SAVE time and work by unloading, mixing and delivering silage in one push-button operation. Step up milk and beef production by installing a VanDale Combination Silo Unloader and Automatic Bulk Feeder. Handles any silage packed or frozen—even grass—delivering it in more palatable form with greater feed value and less spoilage. VanDale Silo Unloaders are available in the Heavy Duty Model, with or without a Booster Unit. VanDale Bulk Feeders fit any shape bunk. Both are completely portable.

1. Heat griddle slowly over medium heat while you mix the batter. Temperature is just right when a few drops of water sprinkled on the surface dance around a second, before evaporating. If your griddle has a thermometer, it should register 400 degrees to 425 degrees.

2. Add milk all at once. Stir batter until the pancake mix is fairly smooth; be careful not to overmix. Small lumps which remain will disappear in baking. They help make the pancakes light and fluffy. For perfect pancakes and buckwheats, follow the easy baking hints on pancake mix package.

3. For an even brown, use a griddle that has been lightly greased with an unsalted shortening. Pour batter on griddle from pitcher or measuring cup. (For medium-sized cakes use ¼ cup of batter.) Turn pancakes when tops are covered with tiny bubbles and the edges look cooked. Turn only once. Do not pat the cakes. Serve "hot" if you're using a "off the griddle."

Manheim FFA Sends 3 To Nat'l. Convention

Three members of the Manheim Chapter, Future Farmers of America will attend the National Convention of FFA in Kansas City, October 12 to 16.

Two of the boys will receive the American Farmer degree while the third will represent the 11,000 FFA

DEAN HOFFER

members in Pennsylvania as official delegate.

Recipients of the highest degree of the farm youth organization will be Dean Hoffer, Manheim R3, past president of the Pennsylvania Association, and Kenneth Boose Lititz R2. Gerald Griner, of Manheim R1, president of the Pennsylvania Association FFA, is on the national board of delegates.

All three young men have studied Vocational Agriculture at Manheim Central High School under the supervision of Joseph H. McGahan.

The American Farmer degree, based on the applicant's farming program, his leadership activities in both the FFA and community organizations, and his scholastic standing, is awarded annually to approximately one boy per 1,000 membership.

Boose, the only married member of the group is engaged in farming on the halves on a 75 acre farm where he raises steers, corn, wheat, hay, tobacco, capons and layers. A 1956 graduate, Boose received the Keystone Farmer degree at the state convention during the Farm Show at Harrisburg in January. His net worth is reported to be \$12,000. Mrs. Boose is the former Eileen Becker.

Hoffer is one of the most active members in the Pennsylvania Association FFA, having won the state public speaking contest in 1957, and being elected president of the organization for the 1958-59 year. It is reported that he has a very good possibility of becoming national presi-

dent when he attends the convention.

Selected as Lancaster County delegate to the American Institute of Cooperation at Raleigh, N.C., in 1956, Dean made the most of the opportunity to travel and speak to groups about the trip. The experience was put to good use in the many other rural organizations claiming him as member. He was and is active in dairy and farm groups in the county.

Crops of soybeans, sorghum, sudan grass, rye, and the

KENNETH BOOSE

75 head of dairy cattle on the 105 acre home farm add up to net a worth of over \$59,000. After his graduation in 1957, Dean borrowed money to buy a half interest in the farm of his parents, Mr. and Mrs. Arthur Hoffer.

Greiner, son of Mr. and Mrs. Lester G. Greiner farms on the home farm in partnership with his father. Steers, hogs, corn, hay, tobacco, layers, and grain in the program are an outgrowth of the Supervised farming program Gerald carried while in school.

Following in the footsteps of his schoolmate, Greiner won the State FFA public speaking contest, in 1958 and

GERALD GREINER

went on to be elected State FFA president at the convention at Penn State University in June.

Interested in a wide variety of activities, Greiner was on the varsity wrestling squad at Manheim Central. He was elected to the Keystone Farmer degree in January 1959.

Scheduled to be held in the Kansas City Municipal Auditorium, the annual convention is expected to draw over 10,000 FFA members

10—Lancaster Evening, Saturday, October 3, 1959

After School Snacks

Let between-meal or after-school snacks give some extra energy to that growing boy or girl. Milk combined with ice cream and fresh fruits will give food value and not just sugar.

If you want to give extra energy, step up the food value by adding dried milk. Use 4 tablespoons dried milk along with 1 cup fresh milk and beat together with your favorite seasonings.

If you need to keep calories low for your youngsters, make the beverages with skim milk either fresh or dried. Add crushed fresh peaches, bananas, blueberries or frozen strawberries, raspberries. Use molasses, maple syrup, or honey for sweetening to give variety. For 1 serving, use 1 tablespoon molasses and 4 tablespoons dry milk with the cup fresh milk. Add a pinch of salt to the dry milk, then beat into the fluid milk and molasses.

COUGH MEDICINES NOW HAVE FLAVOR

Tough Competition Faces U.S. Farm Exports

The United States faces mighty tough competition in the agricultural export market to western European countries.

This was the conclusion arrived at by a group of extension agricultural economists who recently toured seven of these countries.

Countries visited included England, France, Italy, Greece, West Germany, Sweden and the Netherlands.

Purpose of the trip, sponsored by the Foreign Agricultural Service, was to gain understanding of U. S. export markets.

Competition from a quality standpoint is especially strong. After World War II we were able to send inferior quality products to these countries and they were glad to get them. Now things are changing.

Specifically, they complain about contamination in U. S. wheat, corn which is cracked from U. S. methods of drying

and handling, and quality of cotton resulting when batches of cotton with different moisture contents are dried together.

Foreign countries are becoming more quality conscious as they develop their production, say the economists who visited both government and private market officials during the five-week tour.

Countries Produce More

Besides the quality angle, competition is getting stronger because many countries are simply producing more agricultural products than ever before.

Even Greece, which has been importing wheat for

years, now produces more wheat than it needs.

The "common market" now being tried among six European countries may also affect U. S. exports.

Klingner and the other economists were impressed by the tremendous recovery being made in some of the countries visited.

And they point out that these more highly developed countries where per capita incomes are relatively high are the best markets for U. S. agricultural products. Right now, western Europe takes about half of the U. S.'s total agricultural exports.

Brightest prospects for increased exports to these countries are for feed grains, hard wheat, certain kinds of tobacco, and vegetable oils, says Klingner.

Come Up With Conclusions

Klingner says those making

Forage Wagon Wears Airplane Tires

AIRPLANE TIRES mounted on a standard self-unloading forage wagon give the vehicle an added appearance. If the predictions of the manufacturer, J. Paul Nolt, Gap Machinery Dealer, prove to be true you will be seeing many more wagons of this type in the future.

Mr. Nolt explains that one of his customers wanted a wagon he could take into the field in all weather conditions and not mar the soil. The 13x29 inch airplane tires seem to provide just about the amount of buoyancy needed.

Mr. Nolt feels that the draft will be less than with standard tires. He also believes that the trend toward green chop feeding of dairy cows, we will see many kinds of machinery on this type of tires soon.

ALL "Certified" SEED IS NOT

BE SURE YOU SELECT THE BRAND
CONSISTENTLY EXCEEDS REQUIREMENTS

DON'T BE FOOLED. All certified seed is not after year, A. H. Hoffman Seeds, Inc. — the producer of "Certified" winter grains in Pennsylvania exceeds the state certification standards for quality by a wide margin.

FOR EXAMPLE:

Penna. Certification Requirements for Wheat

A. H. Hoffman's Certified "Pennsylvania" (4 years)
99.0% (minimum) — PURITY — 99.64%
1.0% (maximum) — INERT MATTER — 0.36%
90.0% (minimum) — GERMINATION — 94.00%
58 lbs. (minimum) — WT. PER BU. — 62.2 lbs.

This explains why farmers who plant Hoffman consistently get better results — bigger better crops . . . why the blue certification tag is enough. The few cents more you may pay for seeds bring back many extra dollars in bigger crops. Sixty years, Hoffman has served the farmers of Pennsylvania with dependable seeds.

For complete information and prices on Hoffman Seneca and Thorne WHEAT, Balbo and Tetra as well as other fall seeds,

contact your Hoffman salesman today or phone TW 8-3421 for delivery right to your farm.

Bugs Must Labels

Department of recently warned apple cider producers they must comply with food and sanitation laws.

by agents of the Department of Foods and the Department proved that many

violations of the laws were occurring.

According to Delmar K. Myers, acting director of the Bureau of Foods and Chemistry, violations usually come under one or all of three counts—the sanitizing of containers, improper labeling of the receptacles and failure to declare the presence of the preservative sodium benzoate, if used in cider.

Myers said that most of the violations cited insani-

tary bottles and jugs. He warns that producers must clean these containers properly.

Pennsylvania law requires the name and address of the producer on each label, the name of the product and the net contents. Producers may not add more than one ounce of sodium benzoate to every eight gallons of cider. If added, notation of the use of the preservative must be made on the label.

Violators are subject to maximum fines of \$1,000 for a third offense. First offense fines are a minimum of \$60 and a maximum of \$100.

With additional cider available as the season progresses, agents of the Bureau of Foods and Chemistry will be alerted to take more samples of cider to be analyzed than in past years.

"This will serve to protect the health of people drinking cider and to penalize unscrupulous operators trying to make a profit at the expense of the public," Myers declared.

Livestock handlers are urged by Penn State extension livestock specialists to be careful with their animals. Carelessness causes bruises which result in large losses of meat, mostly in the areas which produce the highest priced cuts.

US & USSR Swap Plant Materials

An exchange program between the United States and the USSR of plant research materials has been reactivated this year after 15 years without official exchange, the U. S. Department of Agriculture reported today.

The program was reactivated through plant research agencies at the instigation of plant breeders in both countries. Some of these breeders have participated in exchange visits to the two countries. International exchange of plant materials was begun in 1898 by USDA's Plant Introduction Section, but was discontinued with Soviet Russia about 1944.

Cooperative exchange of new and indigenous plant varieties between the United States and the USSR has proved to be highly beneficial to agricultural advancement in both countries because of similarities in climate, agricultural interests, and crop problems.

Before 1944, U.S. plant

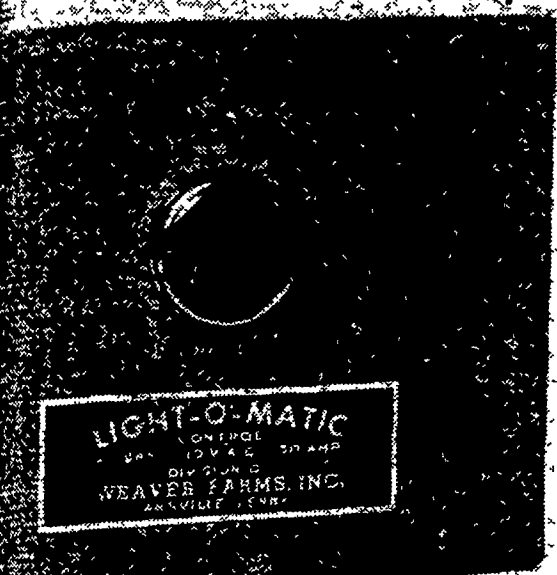

breeders received several important types of grasses and alfalfa from Russia. From U. S. contributions under the program, Russia now raises 10 million acres of sunflowers of American origin—a major source of vegetable oil in that country.

Since March, 577 shipments of forage (grass, legume), oilseed, and small grain and cereal crop seeds have been exchanged. Future exchanges this year will include tobacco stock and fruit varieties.

Requests for foreign plant materials by U. S. research agencies and corresponding requests for U. S. seed from abroad are cleared at USDA's Plant Industry Station, Beltsville, Md. In Russia, all seed exchange is through the All Union Institute of Plant Industry, Leningrad.

Feed the freshening cow a balanced ration, recommends Joe Taylor, Penn State extension dairy specialist. She needs protein and energy to start maximum production. Also provide a well-bedded area and plenty of room to move. Protect her from under chilling or injury which may lead to mastitis.

Light-O-Matic Light Control for Broilers and Layers

This device in poultry housing, lights will turn on only when natural light is insufficient. It can also operate automatically to give light in dark using a time clock. It is placed in a poultry house window, and will turn on the lights on dull days when they are needed.

with HARVESTORE®

and HIGH-MOISTURE CORN

Yes, high-moisture corn can be profitable these days. Purdue University tests show that you can produce the same beef gains on 12-15% less feed with high-moisture corn processed through a HARVESTORE. That amounts to a saving of 3¢ per lb. of beef gain. Other tests show you can save another 3.2¢ per lb. of gain by reducing field and storage losses through earlier harvesting. That's a total of 6.2¢ saved on every pound of beef gained. It's all made possible by HARVESTORE'S exclusive sealed, oxygen-free construction. See us for complete details . . . and secure your free copy of the HARVESTORE Farm Profit Plan.

Sealed, oxygen-free HARVESTORE . . . the landmark of high-profit farming

THE SMILE OF SATISFACTION on the face of 10 year old Carol Ann Hess, Strasburg R1, daughter of Mr. and Mrs. Elvin Hess, Jr., reflects the pride, care and grooming that went into the winning of the fitting contest at Lampeter Fair on Sept. 23. The judge, Ben Morgan, complimented Carol Ann on the cleanliness and grooming of her chunky Hereford. This was the young lady's first steer in 4-H competition. —LF PHOTO

Farm Women No. 6 Celebrate Birthday

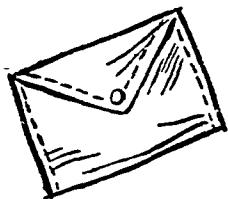

Highlights of her term of office will be presented by each of the past presidents of Farm Women's Society No. 6 at their 39th anniversary meeting to be held this afternoon at 2:30 in the dining room of the Friendship Fire-hall, Elizabethtown. Main speaker for the afternoon will be Mrs. Ralph Coleman, daughter of the first president of Society No. 6. Special music will be presented by the society's vocal trio composed of Mrs. Ray Hixon, Mrs. Charles Nissley, and Mrs. Charles Rife. Concluding the program will be a turkey dinner with all the trimmings.

"I THOUGHT ALL TRACTORS WERE PRETTY MUCH ALIKE ...

PROOF DEMONSTRATION!"

Let's face it... most tractors are pretty much alike. But get a Case-o-matic tractor proof demonstration and you'll feel a POWERFUL difference! Case-o-matic Drive tractors sense changing loads instantly... automatically increase pull-power up to 100% without clutching, shifting or stalling. Try Case-o-matic... and you'll never want to be without it!

GET YOUR FREE RAINCOAT

It's our "thank you" for the privilege of demonstrating. Call us right away and let's make a demonstration date. No obligation, of course.

Now is the time to **TRADE** and get our **Special extra generous allowance!**

A LOVELY MISS ON A NEW TRACTOR crossed the finish line first in the tractor trouble-shooting contest at the Lampeter Fair on Wed., September 23. It was all done to promote the Garden Spot Chapter FFA. and their Chapter Sweetheart, Miss Veda Kay Sollenberger, a senior at Lampeter-Strasburg High School. Miss Sollenberger who lives on Lampeter Road has worked as a model in a Lancaster Department store.

Real winners in the contest were, 1. Merle Groff, representing 4-H, Strasburg R1; 2. Elvin Rohrer, Jr. West Lampeter Young Farmers, Horseshoe Road; 3. Robert Kauffman, president of Lancaster County Holstein Breeders Association. —LF PHOTO

Atomic Research Tells Inside Story of Hen

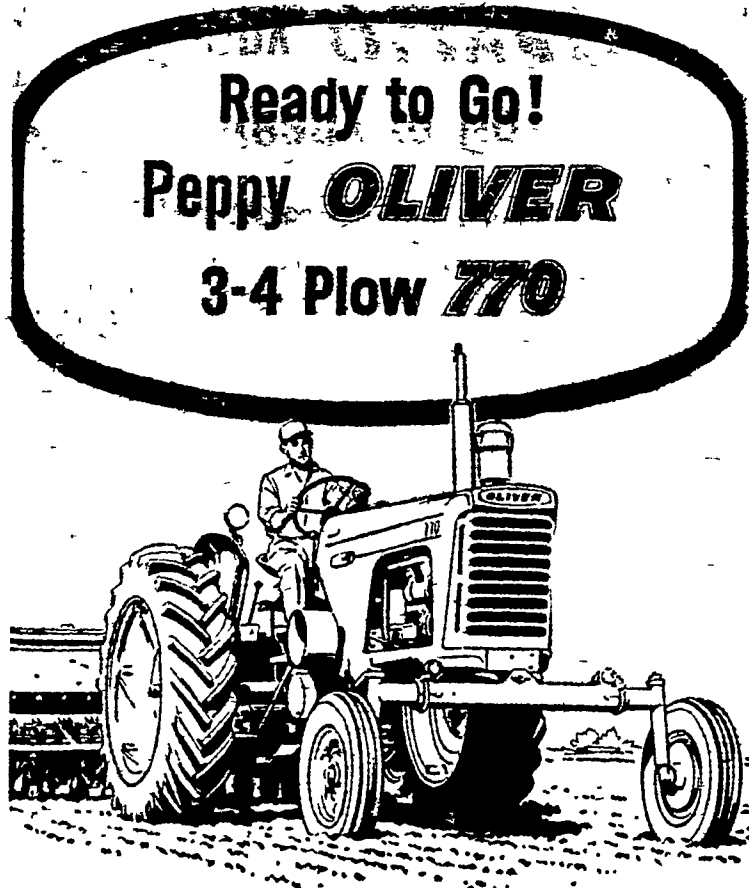

When it comes to high-speed manufacturing, the humble hen has it all over man-made machines. But if it were not for atomic energy, she never would have received the credit.

Prof. Robert A. Monroe, Cornell University poultry scientist, has found that you

can give a chicken a dose of calcium and within five minutes she'll have a trace of it in the fresh-laid egg.

This dramatic manufacturing process will be demonstrated for poultrymen attending the exposition of the Northeastern Poultry Producers Council (Neppco), in the Farm Show Building, October 6-7-8.

Flashing lights, moving needles and intricate measuring devices will track the hen's use of "hot" calcium. A Geiger counter will be op-

All new...and all set to go, ready to turn out more work in a day and to make it easier for you.

First of all, there's more horsepower in this new 770, coming from a deeper-breathing, higher-speed engine. Add the new Power-Booster Drive and you get 12 forward speeds, almost one-third more pull for heavy going at the touch of a lever—on the go.

Hook a new 4-bottom semi-mounted No. 5440 plow to Oliver's new Power-Traction Hitch and forget about the tough spots. Your 770 just bears down, steps right through at full speed. Put on Powerjuster wheels; let the engine change tread. And make driving a pleasure with power steering.

This is only the beginning. There's a lot more to see in the new 770. You'll want to feel this snappy power, too—in all the exciting new ways.
